

UniPortal

For a Clear View Of Your Business Online...
...Anytime

Uniwell specialises in the design, development and distribution of EPOS systems for hospitality, catering and retail markets. The new partnership with business and operational intelligence specialist PXtech will see PXtech distribute Uniwell's renowned products across the world through its established reseller network.

Futhermore, PXtech envisages further enhancing the Uniwell product range and offering to Uniwell customers worldwide by integrating its innovative, real-time business and operational intelligence platform, PXportal, branding the product as UniPortal.

PXtech Business Intelligence solutions are used daily in over 30,000 outlets worldwide.

Uniwell managing director Ted Taniguchi comments:

"this new partnership enables Uniwell's customers to benefit from the extensive, real time business overview which the UniPortal solution delivers. PXtech's expertise in web-based business intelligence and back office solutions will complement and enhance Uniwell's renowned product range."

BUSINESS INTELLIGENCE TOOLS

CLEAR, ACCURATE AND REALTIME
UNDERSTANDING OF YOUR BUSINESS DATA,
RIGHT DOWN TO INDIVIDUAL TRANSACTIONS.

UniPortal - Benefits at a glance

What is UniPortal?

The UniPortal suite of hosted web based applications is a new cost-effective alternative to traditional back office software and brings EPoS Business Intelligence into the 21st Century.

“My sales information is no further away than my smartphone...”

The UniPortal suite is developed and supported in the UK. The solution is already in use in over 30,000 locations worldwide and is the chosen Business Intelligence Solution for the worlds largest restaurant chain, Subway.

Product Features - UniPortal

Sales information can be accessed at any time, anywhere, on any web capable device.

Daily Sales produced directly from the EPoS system in near real-time.

Trading information is updated throughout the day and allows historic data to be retrieved and filtered by POS or location.

Information can also be shown at either branch or head office level.

Labour / Productivity takes the time-clock events from the EPoS system and displays staff that are currently clocked in and the hours worked compared with sales volume at hourly intervals.

Key Performance Indicators (KPIs)

Alert the user of potential transaction fraud or mis-management, highlighting sales adjustments or other high risk transactions reaching user defined thresholds.

Information includes a traffic light signal system to provide a quick visual alert.

Drill-down allows users to quickly access individual transactions and then broaden or refine the search to identify trends or patterns of

Financial Reports can be easily extracted and exported into PDF, Excel and Word formats.
